### **1998 FORD EXPLORER 5.0L V8 Repair Manual | RockAuto**

I have a 1998 Explorer that the speedometer AND odometer stop working after driving 5 to 8 miles. At first I thought the sub zero weather could have something to do with it however that does not appear to be the case. I reset the trip odometer every time I start the vehicle and depart. The average distance I get before it stops working is 6 miles.
