The following are warning lights and indicators found in vehicles built by Audi. Click a link to learn more about each one. They are roughly ordered by importance, which tends to be by color (red, amber, yellow, orange, green, blue, gray), but there are nearly 80 of them, so be patient!

Audi Warning Lights and Symbols | DashboardSymbols.com

What's needed is for the Audi to keep its coolant water about 30 degrees below boiling, or 180 degrees Fahrenheit. This allows the water to carry away the engines excess heat and keep it from overheating. The cooling system is composed of four major components: the radiator, water pump, radiator fan and thermostat.

Audi A3 Coolant Temperature Sensor | CarParts.com

I have had the P2181 MIL for a while now, and have yet to figure out what the problem is. The options that I have seen as a possibility are: low coolant level, water pump, thermostat, fan switches, coolant temperature sensor (CTS), and coolant level sensor. Since my car has not overheated (needle stays right in the middle), both fans run at idle, and my coolant level is fine, I have looked not ...
