Homogeneous background echotexture – fat b.Homogeneous background echotexture – fibroglandular c. Heterogeneous background echotexture Masses Shape Oval Round Irregular Orientation Parallel Not parallel

### QUICK REFERENCE - American College of Radiology

BI-RADS category 5 means there's a high suspicion of malignancy and that appropriate steps should be taken. The finding might be masses with or without calcifications. While microcalcifications are most often benign, there are occasions where their patterns are more worrisome.

### Mammogram Reports and BI-RADS: Categories 4 & 5 ...

What is a BI-RADS assessment category? Doctors use a standard system to describe mammogram findings and results. This system (called the Breast Imaging Reporting and Data System or BI-RADS) sorts the results into categories numbered 0 through 6.

### Understanding Mammogram Reports | Mammogram Results

BI-RADS 5. Highly Suggestive of Malignancy. Appropriate Action Should Be Taken: BI-RADS 5 must be reserved for findings that are classic breast cancers, with a >95% likelihood of malignancy. The current rationale for using category 5 is that if the percutaneous tissue diagnosis is nonmalignant, this automatically should be considered as discordant.
