Ancient Greece Geography Document Based

Document 1 Mountains cover most of Greece, and the land is rocky with little fertile soil. A Greek legend tells that God sifted the earth through a strainer while making the world. He made one country after another with the good soil that sifted through, and threw away the stones left in the strainer. According to

Geography of Ancient Greece Document Based Question

Ancient Greece was located on the southern European mainland. The modern-day country of Greece includes not only the mainland portion, but also includes hundreds of islands. The biggest of these islands is Crete, south of the mainland. Northeast of Crete is another large island called Rhodes. Mountains and hills cover nearly three-fourths of Greece.

Geography of Ancient Greece Handout 1

The geography of ancient Greece was divided into three regions: the coast, the lowlands, and the mountains. The rocky and uneven soil on the peninsula of Greece allowed for less than 20 percent of the land to be farmed, so the Greeks relied heavily on imports of grains and other foods from other regions around the Mediterranean.
