The National Aquaculture Act of 1980 is a U.S. federal law that is intended to promote and support the development of aquaculture. The act aims to encourage development of aquaculture in the United States because aquaculture has the potential to reduce the U.S. trade deficit in fisheries products, augment existing commercial and recreational fisheries, and produce other renewable resources.

2.1 Aquaculture policy. In most countries a specific aquaculture policy document does not exist and aquaculture is normally included basically in the Fishery Sector Development Policy, document. It is also mentioned in other strategic policy documents; those for Industry and Environment are the two major policy documents concerned.

2. Aquaculture policy, administration and legislation

restoring fisheries productivity, and moving towards more environmentally friendly and responsible aquaculture. There is a need for reform in both fisheries and aquaculture to reduce their environmental and social impacts. USAID's experience has shown that well-designed programs can reform capture fisheries management,

SUSTAINABLE FISHERIES AND RESPONSIBLE AQUACULTURE

The activity of aquaculture is by nature multidisciplinary and multiform; this reality is also reflected in the legal approach to it. One of the main conclusions to which this comparative study on aquaculture leads is that there are a number of ways in which a state and its legal system could deal with aquaculture.

1. AQUACULTURE IN THE LEGAL FRAMEWORK

At NOAA Fisheries, we support cutting-edge science and research as well as federal policy making and regulation to grow sustainable aquaculture in the United States and reap its social, economic, and environmental benefits while supporting commercial and recreational fisheries.
