If you're into stuff like this, you can read the full review. (Original review, 2009) Ho=c/R=c|CT=1/T: "Before the Big Bang - The Prehistory of Our Universe" by Brian Clegg A friend of mine many eons ago said "all we have left to do is cross the T's and dot the I's". I was skeptical then and now I just laugh. He liked to look through a telescope and he believed what he thought he saw.

Before the bang It's possible that before the Big Bang, the universe was an infinite stretch of an ultrahot, dense material, persisting in a steady state until, for some reason, the Big Bang...

### What Happened Before the Big Bang? | Live Science

Before there was an Earth, there was just a big cloud of gas and dust floating out in the universe. Before there was a universe ... well, before that is a point that physicists spill a lot of ink over. We don't know what happened before the Big Bang gave birth to the universe, but the smartest people in science have plenty of fascinating theories.

### What Came Before the Big Bang? | Latest Science News and ...

Once you think about that, an even more difficult question arises: What existed just before the big bang occurred? The question itself predates modern cosmology by at least 1,600 years. Fourth-century theologian St. Augustine wrestled with question of what existed before God created the universe.
