IIRC. It was determined (but not BMW confirmed) on another forum that 1999 Z3's (not M's) do not have ABS relays. Such relays were only found on M models (in a typical place and clearly marked as 'ABS'). Guess that's what comes from being a 'parts bin' car.:dunno:

### **Z3 1999 2.8L ABS Relay location? | Bimmerfest BMW**

On your Z3, the electric fan is the only radiator cooling fan. There is no engine driven fan. This would be common to most of the BMW 4-cylinders for the '90s model years. BMW also applied this to many of the 6-cylinder models through the 2000s and, of course, all MINI models.

Your engine overheated because of a stuck thermostat, you said. From other posts here and there, the Z3 cooling system works like this: The Z3 uses a two way thermstat to blend the cool an warm waters in order to supply a constant inlet temperature. The thermostat does not control the engine temp, it controls the coolant temp entering the engine.
