1.2 Phases and Classification of Matter.  
Matter is anything that occupies space  
and has mass. The basic building block  
of matter is the atom, the smallest unit  
of an element that can enter into  
combinations with atoms of the same or  
other elements. In many substances,  
atoms are combined into molecules.

THE FIRST CHAPTER. PUDDLEBY. NCE  
upon a time, many years ago—when our grandfathers were little children—there was a doctor; and his name was Dolittle—John Dolittle, M.D. "M.D." means that he was a proper doctor and knew a whole lot. He lived in a little town called, Puddleby-on-the-Marsh. All the folks, young and old, knew him well by sight.

Chapter 1: Atoms and Molecules  
Sugar,salt,sand, diamond ,graphite, copper, silver, gold,iron, aluminum, wood,rocks, minerals, food and fabrics are all different kinds of matter. Matter is called 'padarth' in Hindi.An Indian philosopher, Maharishi Kanad, said that if we go on dividing matter, we will get smaller and smaller particles of matter.
