Plant disease - Plant disease - Symptoms: The variety of symptoms, the internal and external expressions of disease, that result from any disease form the symptom complex, which, together with the accompanying signs, makes up the syndrome of the disease. Generalized symptoms may be classified as local or systemic, primary or secondary, and microscopic or macroscopic.

Plant disease - Symptoms - Encyclopedia Britannica

Bacterial diseases can be grouped into four broad categories based on the extent of damage to plant tissue and the symptoms that they cause, which may include vascular wilt, necrosis, soft rot, and tumours. Vascular wilt results from the bacterial invasion of the plant's vascular system.

Plant disease - Symptoms and signs | Britannica

Plant disease - Plant disease - Soil pH: Soil pH, a measure of acidity or alkalinity, markedly influences a few diseases, such as common scab of potato and clubroot of crucifers (Plasmodiophora brassicae). Growth of the potato scab organism is suppressed at a pH of 5.2 or slightly below (pH 7 is neutral; numbers below 7 indicate acidity, and those above 7 indicate alkalinity).

Plant disease - Soil pH - Encyclopedia Britannica

Basidiomycetes Ustilago spp. (smuts) smut of barley Rhizoctonia spp. Phakospora pachyrhizi (soybean rust) Puccinia spp. (severe rusts of cereals and grasses) Armillaria spp. (honey fungus species, virulent pathogens of trees)

Plant pathology - Wikipedia

diseases of plants. Most plant diseases are caused by fungi, bacteria, and viruses. Although the term disease is usually used only for the destruction of live plants, the action of dry rot and the rotting of harvested crops in storage or transport is similar to the rots of growing plants; both are caused by bacteria and fungi.

What causes plant disease? Most people would answer this question by saying that plant pathogens, such as fungi or bacteria, cause plant disease. But this is only part of the answer. Plant pathologists talk about a combination of three crucial factors that must be present to have plant disease. These three factors are often referred to as the plant disease triangle.
