Detuner is a generic term for a jet engine test cell exhaust system muffler.. Aircraft jet engine testing facilities typically require a means to vent and dampen the engine exhaust. The engine exhaust flow is "augmented" with a relatively large flow of cooling air induced by a Venturi effect into the exhaust silencing system, so the exhaust muffler is generally referred to as an "augmenter" ...

A fuel cell makes electricity using the energy released by mixing fuel with air, a reaction which creates water and sometimes also carbon dioxide.The most common fuel for fuel cells is hydrogen, which when reacted with oxygen from air produces only water. Fuel cells work like a battery being constantly fed with fuel so it never runs out (as long as you have enough fuel).
