An alternative adaptation of the State's Biodiversity lab. I have concentrated on the evolutionary relationships aspect of the lab and removed the biodiversity piece, to be done separately. At this time, you will still need the first two pages of instructions from the State lab, but I have students write all answers in this version of the lab.

This lab is based on a game invented by G. Ledyard Stebbins, a pioneer in the evolution of plants. The purpose of the game is to illustrate the basic principles and some of the general effects of evolution by natural selection. The students take turns acting as predators of butterflies camouflaged on various patterned cloth backgrounds.
