From Brouwer To Hilbert The

In a foundational controversy in twentieth-century mathematics, L. E. J. Brouwer, a proponent of the constructivist school of intuitionism, opposed David Hilbert, a proponent of formalism. The debate concerned fundamental questions about the consistency of axioms and the role of semantics and syntax in mathematics.

From Brouwer To Hilbert: The Debate on the Foundations of Mathematics in the 1920s offers the first comprehensive introduction to the most exciting period in the foundation of mathematics in the twentieth century. The 1920s witnessed the seminal foundational work of Hilbert and Bernays in proof theory, Brouwer's refinement of intuitionistic mathematics, and Weyl's predicativist approach to the foundations of analysis.

The Hilbert-Brouwer controversy resolved? Per Martin-Löf Since this lecture is called the Beth lecture, it is natural to ask oneself: what connection is there between Beth and intuitionism? and, to my mind, the most obvious answer is: the Beth models for intuitionistic propositional and predicate logic.

Poor Hilbert: first he is pestered by Brouwer's assault and the loss of Weyl, then his "programme" is demolished by the constructivist/Platonist Goedel, and then the Nazis finish off his faculty. (I am confused/uncertain about the relationship between constructivism and Intuitionism -- does "constructivism" exist without Intuitionism at its core?).

Brouwer's Cambridge Lectures on Intuitionism

The newspaper Berliner Tageblatt proposes a public debate between Brouwer and Hilbert, to be held in its pages, but for some reason this is not realised. Neither does Brouwer complete the book he is invited to write by the German publisher Walter de Gruyter. The lectures and an incomplete book are published posthumously (Brouwer, 1992).

He praises Brouwer's theory but maintains that Hilbert's programme can be pursued all the same since one may "fuse mathematics with physics and assume that the mathematical concepts of number, function, etc. (or Hilbert's symbols), generally partake in theoretical construction of reality in the same way as the concepts of energy, gravitation ...

Hilbert wrote a warm letter of recommendation which helped Brouwer to gain his chair in 1912. Despite the substantial contributions he had made to topology by this time, Brouwer chose to give his inaugural professorial lecture on intuitionism and formalism.
