Hands-On Ecology was written for traditional classrooms for grades three to five. Even though activities continually refer to classroom-size groups and school grounds, most activities can be easily adapted for a homeschooling family to use. In fact, some activities would be much more practical for a family than a classroom.

### Hands-On Ecology

In order to give consideration to the diversity of hands-on activities, we specifically looked at individual hands-on activities in order to detect possible differences between them. A particular focus was placed on four categories of hands-on activities that are typically conducted in biology lessons, namely experimenting, conducting dissections, working with microscopes, and classifying creatures.
