hostage rescue attempt. It does so by explaining the phenomenon of a hostage crisis biorhythm and proposing four principles essential for success. The principles of hostage rescue operations presented in this thesis and used in the biorhythm model—surprise, intelligence, operator's skill, and deception—are derived from looking at numerous

NAVAL POSTGRADUATE SCHOOL

Passenger abduction and hostage taking are commonly used by terrorists and hardcore criminals. The inside of a hijacked bus, train or airplane is one of the most challenging environments in which a force can be called upon to operate. A combination of thin metal walls, extremely crowded lines of fire, difficult approach and the possibility of sudden location change are just a few of the volatile conditions that make mobile environment hostage rescue a complex task.
