Hydrology And Floodplain Analysis Bedient

Bedient has worked on a variety of hydrologic problems, including river basin analyses, major floodplain studies, groundwater contamination models, and hydrologic/GIS models in water resources. He has been actively involved in developing computer systems for flood prediction and warning, and recently directed the development of a real-time flood alert system (FAS2) for the Texas Medical Center (TMC) in Houston.

and design methods required to understand hydrology and floodplain analysis. It addresses the computational emphasis of modern hydrology and provides a balanced approach to important applications in watershed analysis, floodplain computation, flood control, urban hydrology, stormwater design, and computer modeling.

Bedient, Huber & Vieux, Hydrology and Floodplain Analysis ...

Hydrology and Floodplain analysis is one of the best hydrology textbooks available. I first worked with this book in college and have been using it ever since as a practicing hydrologist and environmental engineer. The textbook is thorough and detailed with excellent examples and case studies. It has a perfect balance between theory and application.
