Maintenance of machinery is frequently handled reactively (e.g. after a breakdown) though it may also be done proactively, as with preventive and predictive maintenance. Preventive maintenance keeps assets in good repair through regular scheduled service; predictive maintenance relies on equipment monitoring to detect problems before they result in a breakdown.

Machine Maintenance | What is Machinery Maintenance ...

Sandblasting offers a chemical-free ability to clean, strip, and smooth surfaces into just-like-new quality. It is great for large areas and surfaces, as well as for small precision parts - like those found in gear boxes and motors. Sandblasting is especially effective at removing and eliminating rust.
