InstallAnywhere 2012 Ant is a powerful, Java based build tool developed by the Apache Foundation's Jakarta Project. It can be used to control complex build tasks in Java and other development environments. Ant manages specific actions through "tasks" which can either be part of the core Ant distribution or available as extensions.

(Scholastic Achievement Manager). I ran the install with the '-r' switch and it generated the 'installer.properties' file. I then ran the installer with '-i silent' and '-f' with the silent UI specified in the file and it'll load for about 20 seconds and then I get a 'script ...

Software Deployment : **InstallAnywhere Silent Install**

I found at the vendor site that at least with Inf PC 8.1.1, the silent install is not supported unless you install all components. I used the default installer.properties file and ran the install locally on a machine with command line similar to this
c:\temp\install\install.exe -i silent -f
c:\temp\install\installer.properties and it seemed to work fine.
