2 Introductory Econometrics for Finance by Chris Brooks An example of a deterministic trend process was given in Figure 8.5. Such a process will have random variations about a linear (usually upward) trend. An expression for a deterministic trend process y_t could be $y_t = \alpha + \beta t + u_t$ where $t = 1, 2, \dots$, α is the trend and u_t is a zero mean white noise disturbance term.
