Oracle JD Edwards World is comprised of an integrated applications suite of comprehensive enterprise resource planning software that combines business value, standards-based technology, and deep industry experience into a business solution with a low total cost of ownership.

Oracle JD Edwards World Documentation

The earliest version of the JDE ERP software was JD Edwards World. This 1980s release focused on accounting and was server-centric. Businesses would use the ERP technology leveraging IBM's green screen. In 1996 the company upgraded the software to JD Edwards One World which used a graphical user interface and Configurable Network Computing (CNC). The next years saw a robust evolution in the software, including a web-based client rollout in 2001.

Jde Accounting User Manual - go.flicharge.com

JD Edwards made a key decision early in the design of OneWorld-the database used by OneWorld would match (or at least not conflict with) the database used by World Software. Thus, the functionality of the early releases of OneWorld would be essentially the same as the functionality of World Software.
