## **Mechanism and Dynamics of Machinery - Hamilton H. Mabie**

Dynamics of Machines and Mechanisms. a branch of the theory of machines and mechanisms that studies the motion of machines and mechanisms, taking into account the forces acting on them. The dynamics of machines and mechanisms deals with the following basic problems: definition of the laws of motion of the components of mechanisms, control of the motion of the components, determination of frictional losses, determination of the reactions in kinematic pairs, and balancing of machines and ...
