Beginning in the Access 2010 release, Access contains many new macro actions that enable you to build more powerful macros than you can build by using earlier versions of Access. For example, you can now create and use global temporary variables by using macro actions, and you can handle errors more gracefully by using new error-handling macro actions.

Like other Microsoft Office applications, Access is supported by Visual Basic for Applications (VBA), an object-based programming language that can reference a variety of objects including the legacy DAO (Data Access Objects), ActiveX Data Objects, and many other ActiveX components.

## **Microsoft Access - Wikipedia**

This works perfectly and I like the UI I created in Access 2007 and BTW loved the features of Access 2007 to re-use forms as templates etc. great for programming and I really liked the flexibility in the UI really outstanding. Okay enough praise for Access 2007. Heres the rub I like the Navigation Forms in 2010 even better!
