### AeroPress Coffee Espresso Maker

How The Aeropress Works 1. Total Immersion Brewing. The Aeropress completely immerses the coffee grounds in water, ensuring all of the grounds come into contact with the same temperature of water. Compare this to typical drip coffee makers where grounds in the center are over-extracted, adding bitterness and unnatural flavors to the final cup. 2.

### How To Use An Aeropress Coffee and Espresso Maker

The Aeropress satisfies most but not all of the properties of an espresso brew. The missing property of the Aeropress espresso is the crema which an espresso maker generates. The Aeropress normally doesn't brew with a comparable pressure to an espresso maker which is the main reason it normally doesn't create crema.

### Can You Really Make Espresso with the Aeropress?

The Aeropress makes smooth coffee to rival my French press (in less time, too) and is so much easier to clean. Once you've brewed the coffee, you take off the filter chamber and use the plunger to push out ALL the grounds right into the trash. The rubber seal scrapes almost every last ground out of the device and into the trash.

**Aeropress Coffee Brewer Review - Is an Aeropress Worth It ...**

The Aeropress is a marvelous coffee brewer. It brews great coffee, can be used literally anywhere and is quite forgiving. One of its few downfalls is that it isn't exactly what it's advertised as: a manual espresso maker. Espresso makers generate anywhere between 8 and 10 bars of pressure when they're pulling shots.
