NHS Networks - Home | Facebook

With NHS England stating that around 88 per cent of GP practices are already part of some form of wider collaboration with other practices, it might be tempting to think that that the new-found importance of primary care networks (PCN) – groups of GP practices covering populations of 30-50,000 – in the NHS long-term plan is really evolution not revolution (they got 25 mentions in the plan: I counted them). It might be equally tempting for many to ignore the changes as being all rather ...

NHS England - Clinical Networks

Primary care networks (PCNs) form a key building block of the NHS long-term plan. Bringing general practices together to work at scale has been a policy priority for some years for a range of reasons, including improving the ability of practices to recruit and retain staff; to manage financial and estates pressures; to provide a wider range of services to patients and to more easily integrate ...

Primary care networks explained | The King's Fund

To help NHS providers implement their pathology network and to enable the NHS to share best practice, we are developing a toolkit of how to guides and templates. We expect the NHS to deliver high-quality, good value pathology services to patients by delivering these services through a series of hub and bespoke pathology networks across the country.

Expanding our product offer – NHS Benchmarking Network

We should be asking how we can build and nurture supportive networks on a civic scale as well. There are already multiple networks in our communities. In Frome in Somerset, the local GP surgery with 30,000 patients, has spent the last three years mapping out 400 groups that already exist, and where there are holes, they are filling the gaps. So ...
