The test program on Linux and OS X\* is built from the Makefile. Since rdrand is a new instruction, it is only supported on 3rd generation Intel(r) Core processors and beyond. It then makes sense to determine whether or not the new instruction is supported by the CPU-- this is done by examining the 40th bit of the ecx register after calling cpuid.

### **User Manual for the Rdrand Library (Linux\* and OS X\* Version)**

Unfortunately, our review and round-up of new features to the OS X El Capitan 10.11 is not enough to give this operating system justice: it needs more coverage to let everyone know how awesome it is. This new operating system rolled out with the goal of improving Yosemite's user interface further and for giving Mac users a better experience.
