The purpose of this presentation is to show how to design a pad eye lug so that it will have reserve strength against side loading in the weak axis. Two methods will be shown:
METHOD 1: A gusset can be added to the rear of the lug as shown in the sketch below. This will provide

sufficient strength for a side load up to 5 degrees.

Three main types of design geometries for pad eyes are described in NORSOK R-002 lifting stand - ard. Type 1 is made of plate, with a uniform thickness, as shown in Fig, 2.
