Paleopathology, also spelled palaeopathology, is the study of ancient diseases in humans and nonhumans through the study of "human mummified and skeletal remains, ancient documents, illustrations from early books, painting and sculpture from the past, and analysis of coprolites." Studying pathologies, these abnormalities in biologic individuals and systems, may be intrinsic to the system itself or caused by an extrinsic factor. Any living organism can have pathology. Studies have historically fo

### Paleopathology - Wikipedia

In 1982, the Conference on Paleopathology and Socioeconomic Change at the Origins of Agriculture was held in Plattsburgh, New York, to examine previously untested theories about how the adoption of agriculture had impacted human health. The collection of those conference proceedings transformed into this landmark book that set the standard for how to collect, analyse, and interpret osteological data in the study of health transitions.
