Payne Furnace Blower Motor Replacement #HC43AE134 - YouTube

I have a payne air handler that had a ECM blower motor. The blower stopped working and I was advised that these motors are only good for about five years, so i bought a universal replacement motor. The original was a plug in type and this one had to be hard wired, I have now learned that this is a different type of motor (a PCS ??).

Read Book Payne Air Handler Blower Motor Wiring Diagram

The HVAC blower motor is responsible for driving cooled air while the air conditioning system is on. It does this by spinning a fan that blows air through the ventilation system and then into the room. A properly functioning AC blower motor is a critical component in maintaining a comfortable temperature inside your customers' buildings or homes.

If you take a look at the blower section of your heating system it is quite easy to see if you have a belt driven blower motor. You will see a motor sitting on top or next to a larger blower wheel connected by a fan belt. Most fans are energized by a fan relay. This is probably the most common cause.
