Conversant in contemporary theory and architectural history, Stan Allen argues that concepts in architecture are not imported from other disciplines, but emerge through the materials and procedures of architectural practice itself. Drawing on his own experience as a working architect, he examines the ways in which the tools available to the architect affect the design and production of ...

## **Practice: Architecture, Technique + Representation - Stan ...**

Architect and theorist Stan Allen examines how different modes of representation affect architectural practice, how, for example, the choice of axonometric, orthographic, or perspective representation reflects complex preconceptions about space, visibility, and design. In addition, he analyzes the role of media in architecture.

Diana I. Agrest (born 1945) is a practicing architect and urban designer and an architecture and urban design theorist, in New York City.. From the beginning of her career, while still a student, she started developing critical work on urban discourse as a result of the inefficiency of the existing urban design theories and models, and her need to find alternative ways to think about the city ...

## **Emerging Technologies in Architectural Visualization ...**

Early 20th century Modernist critiques of conventional architectural representation included statements degrading the 'sauce' of the prevailing illustrative techniques in architecture and urbanism. That 'sauce' being the shadows produced by the interaction of the buildings with the sunlight, people enjoying the comfort of the spaces ...
