operated

This is largely thanks to a small device on your main water line known as a “pressure reducing valve,” or PRV for short. The water pressure in the city’s main water network is usually far too high for most homes to effectively use and is also prone to fluctuations as homes increase and decrease their water usage needs.

4 Signs It's Time To Replace Your Pressure Regulator ...

Pressure Reducing Valves are designed to reduce incoming water or steam pressure to a safer constant predetermined downstream level. Depending on the type of valve, the downstream pressure is established by a pressure adjustment setting on the valve or by an external sensor.

How To Install a Pressure Reducing Valve - YouTube

Vacuum Regulating Valves (VRV) allow beverage pumps and brix pumps to receive liquid from a pressurized source. Automatic Selector Valves (ASV) permit two or more syrups (BIBs) to be connected at the inlet port of the BIB pump. Water Pressure Reducer Valves (WPRV) are fixed pressure, non-adjustable, water-reducing devices.
