Repairing damaged wildlands requires realistic objectives that consider the extent of damage, ecological potential, land-use goals, and socioeconomic constraints. Since wildland ecosystems are dynamic and constantly changing, rather than static and predictable, it is unrealistic to set predeWned species groups as goals.

Fix cracked or split shingles instead of replacing them. If shingles become cracked or otherwise split, because of falling branches or other types of damage, consider using adhesive to repair them as best you can, instead of removing them completely. Line the crack with a liberal amount of adhesive and stick it back together to repair it.
