Timing Components for Smart Fortwo for sale | eBay

The timing chain on your vehicle is the connection between the crankshaft and camshaft. The timing chain is a crucial piece of equipment that, when working properly, causes the valves to open and close at very specific intervals in relation to the position of your pistons for optimum operation of your engine.

How to Change a Timing Chain (with Pictures) - wikiHow

A timing chain is made of metal, similar to a bicycle chain. A timing chain runs inside the engine, as it needs to be lubricated by the engine oil. A timing belt typically needs to be replaced between 40,000 and 100,000 miles depending on the vehicle. It's a few hundred dollar repair.

When does the timing chain need to be replaced?

SMART Timing & Technology The name SMART is an acronym for Superior Management and Advanced Race Technology.

SMART Timing & Technology

There is an easy way to find out if your car is driven by a timing chain or timing belt motor. If, on the side (not top) of the engine, either left or right, there is a plastic cover, your car has timing belt. If there is no plastic on the side, you have a timing chain. Here is a video that explains and shows the point.

Which cars have timing chain or belt? - A. Diduc
