This book is the brother to The Anarchist's Toolchest. While there are plans for pieces in it (some of which I'd like to build, others that I don't find appealing) the focus isn't on the plans themselves but the simple design process (prototyping) and techniques (board, staked) that were used to arrive at the finished piece.

These books in the "anarchist" series - the tool chest book, the design book and the forthcoming workbench book - are as much about making furniture as they are about making a life outside the normal corporate structure. And as a bonus, the stuff I write doesn't end up lining the Birdcages of America.

For the second book, "The Anarchist's Design Book," I looked to 18th-century pattern books and 17th-century texts. The book's physical size is the same as Andre Felibien's "Des Principes de l'Architecture..." The body copy is Caslon 12 point (on 13-point leading). Caslon is from the early 18th century (circa 1722).

A good book on the subject is "The Poor Man's James Bond". If all of this seems too complicated to you, there is one other method available for counterfeiting: The Canon color laser copier. The Canon can replicate ANYTHING in vibrant color, including US currency. But, once again, the main problem in counterfeiting is the paper used.
