The Built Environment A Collaborative

Drawing from the expertise of thirty prominent academics in their respective fields, this Second Edition of The Built Environment is a collaborative work that takes an integrated and global view of the components and contexts that compose the built environment—the products, interiors, structures, landscapes, cities, and regions—within the context of the earth's life support system. This important work encourages readers to explore the interconnectedness of human-created objects, places ...

The Built Environment: A Collaborative Inquiry Into Design ...

Built Environment. Our built environment includes all the human-made physical spaces where we live, recreate and work. These include our buildings, furnishings, open and public spaces, roads, utilities and other infrastructure. These structures and spaces affect our health by bringing pollutants into our environments and by allowing or restricting access to physical activity, transportation and social interactions.
