The Microgrid Design Toolkit (MDT) is a decision support software tool for microgrid designers in the early stages of the design process. The software employs powerful search algorithms to identify and characterize the trade space of alternative Once the trade space has been characterized, the software provides many

Microgrid Design Toolkit (MDT) - Integrated Grid

The same way grids help an individual design more efficiently and add content to a page, they help other designers understand the structure of a design and do the same. Your grid becomes a blueprint for the design that others can quickly follow. This makes it easier for a different designer to take over a project or for multiple designers to ...
