The Distance of the Moon | Radiolab | WNYC Studios

The ongoing Lunar Laser Ranging experiment or Apollo landing mirror measures the distance between surfaces of Earth and the Moon using laser ranging. Lasers at observatories on Earth are aimed at retroreflectors planted on the Moon during the Apollo program (11, 14, and 15), and the two Lunokhod missions. Laser light pulses are transmitted and reflected back to Earth, and the round-trip ...

Lunar Laser Ranging experiment - Wikipedia

The moon's orbit around the Earth is elliptical with the Earth at one focus and with eccentricity 0.0549. If the distance between between the moon and Earth at the closest point is 363,300 km ...

The moon's orbit around the Earth is elliptical with the ...

Distance to the Moon - The Miles to the Moon from Earth

"The Distance of the Moon" by Italo Calvino This guy's imagination knows no bounds! THE DISTANCE OF THE MOON Delightfully imaginative tale of love awakened and diffused. "We went to collect the milk ...

The Distance of the Moon by Italo Calvino - Goodreads

The Distance of the Moon is the first story in Italo Calvino's The Complete Cosmicomics, and proves an excellent ambassador for the author's style and works. Each book in the Cosmicomics begins with an apocryphal scientific quote, although usually based on some actual scientific fact, [1] and we are given a tale by the irrepressibly present Qfwfq, who seems to have been around for most events in the history of the universe.

The Distance of the Moon by Italo Calvino (Reading ...

The Distance of the Moon takes as its starting point the fact that the moon used to be closer to the Earth. What follows is a strange story about a group of people who would row a boat out to the point where the moon was closest, prop up a ladder, and then climb up onto the moon to collect the moon's milk.

The Distance of the Moon — Michael Ippolito

"The Distance of the Moon" features film clips, historic photos and artist renderings exploring the factual and fictional fascination the moon has had on people's imaginations. The title comes from one of Wischmeyer's favorite short stories by Italo Calvino, in which the moon is so close to the earth that people row boats into the ocean and climb a ladder to harvest moon milk.

'The Distance of the Moon' at Akron Art Museum

When the distance from the Earth to the Moon comes up, the common figure thrown around is 402,336 km (or 250,000 miles). But have you every wondered how astronomers got that figure? And how exact...
