diverse. The wide variety of these screenshot tools range from simple and easy-to-use to powerful command-line tools that offer the ability to script and automate the process.

How to Take a Screenshot on Linux

My own personal favorite is Gnome Screenshot. Typically I use Linux on a desktop or laptop and the training materials even those on those that feature the command line can be easily captured by Gnome Screenshot. I like it because it provides some options that make later use of those screen grabs easy to use.
