Ginot’s book, The Neuropsychology of the Unconscious: Integrating Brain and Mind in Psychotherapy, is no exception. At first I took this to be yet another book in a long line of reductionist treatises — treatises that espouse the superiority of neuroscience and all things material over that of the qualitative and intuitive nuances required ...

The Neuropsychology of the Unconscious: Integrating Brain ...

The Neuropsychology of the Unconscious by Dr Efrat Ginot provides a sophisticated explanation of how complex neurobiological mechanisms interface with unconscious processes, involved in emotional self-states such as bonding, fear, anxiety, and trauma. The book is introduced with an elegant foreword by Dr Allan Schore, whose work has been largely dedicated to examining the role of the brain’s right hemisphere in shaping implicit processes and the unconscious mind.
