Train the Brain to Hear: Understanding and Treating ...

Even with hearing aids, your brain needs to relearn what it forgot when you couldn't hear. Some sounds may seem foreign. This is where audio training games may help. These games are fun...but not just for fun. In a Harvard Medical School study, they took a group of people around 70-years-old with severe hearing loss.

Retrain Your Brain to Hear Better | Helping Me Hear

The brain is like a muscle. And by "exercising" those areas responsible for sound processing, you can rebuild neuro pathways that have been weakened. Unfortunately, many audiologists view auditory training as an "add-on" - preferring to rely exclusively on more traditional remedies like hearing aids.

You can also try these 11 Brain Training Apps to Train Your Mind and Improve Memory.

8 Ways to Train Your Brain to Learn Faster and Remember More

Once you start using hearing aids, the hearing processing resumes, supplying signals to the brain. In this way, your hearing will improve but you will also keep your brain fit and active. But the longer you wait, the more difficult it is to be able to hear again and activate the parts in the brain that pick up and process sounds.
