## **Netflix Threatened By New Video Streaming Technology**

Streaming video and audio files are compact and efficient, but the best ones start out as very large, high-quality files often known as raw files. These are high-quality digital files or analog recordings that have been digitized, and they haven't been compressed or distorted in any way.

## **How Streaming Video and Audio Work | HowStuffWorks**

Online video codecs are an essential part of live streaming video over the internet. RAW digital video files are composed of a series of still pictures. When these videos are played in succession at a high speed, you get a video. Similarly, RAW digital audio is simply a collection of measurements of the magnitude of various tones.

## **Streaming Codecs for Video and Audio: What Broadcasters ...**

Streaming has traditionally delivered audio and video, but Apple has recently implemented technology that allows streaming to work with games and apps, too. This technique, called on-demand resources, structures games and apps to include a core set of functions when the user first downloads them and then streams new content as the user needs it.
