### Volkswagen Transporter T3 Engine

There was one more six-cylinder engine, used in the VW Oettinger WBX6. The development of the engine was originally contracted to Oettinger by Volkswagen; it was derived from the regular Wasserboxer and meant for projected use in the T3. When VW abandoned the project, Oettinger bought the rights to the design and put it on the market.

The waterboxer engine is a watercooled derivative of the aircooled flat four Beetle engine. It was only used in Type 25s. We offer a great selection of water cooled VW T3 parts for both 1.9 and 2.1 models. The diesel engine is a watercooled inline four cylinder engine. It is similar to the diesel motor found in Golfs of the same era.
