Calderbrook

The WEINIG structure planing technology makes it possible to move the spindle relative to the work piece as it is fed through and in this way to create a three-dimensional surface. Using CAD software the structured surfaces can be checked and simulated in advance and then actually produced on the moulder.

Planing and profiling with WEINIG

The Weinig patented steel feed roller is recognized to be the best for rough or smooth stock situations, and can be used on many types of moulder - even other brands. Many operators struggle with counter-profile shoes for difficult profiles made from scraps of wood, etc.

Moulder Parts & Supplies

WEINIG meets this challenge with innovative machine technology. The combination of slanted horizontal spindles and floating vertical spindles allows the lamellae to be planed with a

Online Library Weinig Profimat 22n

minimum of chip removal on all four sides while maintaining the curvature of the wood. These WEINIG solutions increase material yield and thus also resource efficiency.
